ABSTRACT

Format Paragraph Spacing After 24pt
Double Space

Privatization is the process of transferring government properties (public utilities) from the public sector to the private sector. There should be rules and regulations, which privatizations have to follow to get those resources. There are both positive and negative externalities from the privatization of water systems. Provision of the basic water services is a government's responsibility in many developing countries around the world. Whether government is unable to supply the water or it lacks the necessary authority over the natural sources of water, the government has to make arrangements for a reliable water provision.

Format Paragraph Spacing After 24pt

This thesis deals with the privatization of water system and its impacts on the stakeholders. How does privatization affect the poor people? The secondary data used for this study is derived from three cases: Metro Manila Waterworks and Sewerage System, Philippines, Espirito Santo Water System, Brazil and Water and Sewerage Utility, Panama. A key priority in designing urban water policy and institutional reforms with the appropriate structure of water charges is to ensure long-term sustainability of supply. The recommendations which are developed in this thesis are that the governments have to be very precise in the specification of the terms and conditions of the privatization, if it is going to achieve its goals.

Keywords: stakeholder analysis, economic analysis, financial analysis.

ÖZ

Devletin vermekle yükümlü olduğu hizmetleri özel sektöre devretmesine özelleştirme denir. Özelleştirmenin gerçekleşebilmesi için kurallar ve düzenlemeler vardır. Özelleştirmede birçok pozitif ve negatif dış etkenler vardır. Gelişmekte olan ülkelerde su dağıtım sistemi devletlerin sorumluluğu altındadır. Devletler yeterli ve verimli su dağıtımını yapamadıkları için özelleştirme yolunu seçmektedirler.

Anahtar Kelimeler: stakeholder analizi, ekonomik analiz, finansal analiz

DEDICATION (Optional)

Title is not needed for dedication. Font size and type is left free and heading should be kept white color.

To My Family

ACKNOWLEDGMENT

I would like to record my gratitude to Assoc. Prof. Dr. Osman M Karatepe for his supervision, advice, and guidance from the very early stage of this thesis as well as giving me extraordinary experiences through out the work. Above all and the most needed, he provided me constant encouragement and support in various ways. His ideas, experiences, and passions has truly inspire and enrich my growth as a student. I am indebted to him more than he knows.

I would like to acknowledge the members of my graduate committee for their advice and guidance, most especially Asst. Prof. Dr. Mine Haktanir for all her advice and encouragement, and who has been a good friend, sister, and mother to me and my family. I am grateful in every possible way. Special thanks go to Asst. Prof. Dr. İlkey Yorganci for her crucial contribution to this study.

My thanks go to my friends who helped and encouraged me during the period of my studies and this thesis such as Mr. and Mrs. Phillips Agboola, Rev. Robin and Val Brookes, Mr. and Mrs Kayode Aleshinloye, Walter, Adolphus, Alheri, and Ethel. Many thanks go to Orhan Uludag for his crucial contribution to this study.

It is a pleasure to pay tribute to the Research Newsletter Staff. In particular, Asst. Prof. Dr. Bahar Taneri and Fatih Parlak for their support during the time of this thesis.

LIST OF TABLES

Table 1: General evaluation measurement of sustainable development recognition.....2

Also it can be including chapter number like Table 1.1

LIST OF FIGURES

Figure 1: Sketch of Hamilton Avenue School5

Also chapter numbers like Figure 1.1 can be included.

LIST OF ILLUSTRATIONS

LIST OF SYMBOLS OR LIST OF ABBREVIATIONS

Style 1, After each paragraph
24pt. or one space

Chapter 1

16 pt, Times New Roman, Bold, Double space, Centered, After space 24pt

INTRODUCTION (Style 1)

Header 1, 16pt, Times New Roman, Bold, Double space, Centered, After space 48pt

1.1 Dynamic Energy Flow

Header 2, 14pt, Times New Roman, Bold, Double space, Left

Much theoretical and experimental effort has been devoted recently to study the dynamics of energy flow, following the initial excitation of a surface molecule.

Format Paragraph Spacing: After 24pt

Most of these studies deal with the processes of dissociative adsorption and desorption of small molecules chemisorbed on metal surfaces; these processes are governed by formation and rupture of covalent adsorbate-metal chemical bonds. The processes of physical adsorption and desorption on non-metallic surfaces have received less attention.

1.1.1 Nonspecific Van Waals Forces

Header 3, 12 pt, Times New Roman, Bold, Double space, Left

The essential feature of the physisorption systems is that the attractive forces between the adsorbate and the surface are relatively nonspecific Van Waals forces.

the interconnectedness of all living systems in a single living planetary system, the biosphere; the importance of natural cycles (of water, nutrients and other chemicals, materials, waste); and the passage of energy through trophic levels of living systems[1].

Quotation, 12 pt, Times New Roman, Single space, indentation

4 cm

2.5 cm

Figure 1: Sketch of Hamilton Avenue School

Table 1: General evaluation measurement of sustainable development recognition

Consumption of renewable resources	State of environment	Sustainability
More than nature's ability to replenish	Environmental degradation	Not sustainable
Equal to nature's ability to replenish	Environmental equilibrium	Steady-state economy
Less than nature's ability to replenish	Environmental renewal	Sustainable development

Before and After each Table and Figure Spacing: After 24pt

Style 2, At the beginning of each paragraph one indentation should be done (about 0.5 cm or 0.2 inches)
